

CANON SOLUTIONS AMERICA

THE PRINTERS THAT ARE EQUALLY OBSESSED.

Professional photographers and graphic designers openly share what they need and want in a printer, like stunning, black-and-white prints with deep blacks, detailed gradations, and wide color gamut that accurately reproduces even the most difficult colors.

The new enhanced Canon imagePROGRAF 60" PRO-6100, 44" PRO-4100, and 24" PRO-2100 professional large-format printers are now available with a new sleek design and transparent features. The PRO Series offers an 11-Color plus Chroma Optimizer ink system that does it all. The best large-format printers Canon has ever engineered, distinguished by a bold red line.

BLACK DENSITY AND DARK SHADOW AREAS

Deep blacks, which make the image crisp, and precise gradation can be attained across all media types. On glossy media, light reflection off a printed image is stabilized by the Chroma Optimizer and Photo Black ink. Overall, your images will enjoy an enhanced dynamic range.

INTELLIGENT MEDIA LOADING

For the first time ever, an imagePROGRAF printer can recognize paper without the need for human intervention. Simply set the roll holder in the printer and let the media automatically feed into the printer. The built-in multi-sensor measures the surface reflection and the media thickness to determine the media type. This feature enables automatic feeding even on thick fine art media.

MULTIFUNCTION ROLL SYSTEM

The Multifunction Roll System—standard with the PRO-6100 and optional for the PRO-4100/PRO-2100 printers—can be used in two different ways.

First, you can load a second roll of a different media type and size at the same time, allowing automatic switching from matte to gloss paper without interrupting your workflow. Or second, you can configure the printer as a bi-directional take-up unit.

ENHANCED SECURITY FEATURES

Newly enhanced security features help ensure PRO Series users can feel confident that even the most sensitive data is protected.

- Secure printing through PIN code entry
- Disk Encryption on all print jobs

COLOR CALIBRATION

The built-in color multi-sensor offers precise calibration and color matching. Using a three-color LED and condenser lens, the sensor enables accurate recalibration of the device, allowing you to maintain a low average printer-to-printer color difference.

A single color calibration performed with one type of media can be applied to all Canon media in all printing modes.

The Device Management Console software, ideal for fleet management, lets you perform color calibrations remotely. This software lets you monitor the printer status of up to 50 units from almost any location in the world!

NEW LCD OPERATION PANEL

The new 4.3 inch operational panel utilizes smartphone technology for easy operation. The top three most-used commands: Load, Feed, and Cut now have their own buttons for ease of use.

PRINT FROM USB THUMB DRIVE

PDF and JPEG files can be printed directly on the imagePROGRAF PRO-6100/4100/2100 printer from a USB thumb drive. Simply input the thumb drive into the USB port on the printer, preview the image on the operation panel, and print!

Wi-Fi™ CONNECTION

The PRO Series printers are Wi-Fi™ compatible. Stay connected!

HIGH-CAPACITY INK TANKS

The PRO Series gives you the capability to mix and match ink tanks based on your printing needs. Having available 160 ml, 330 ml, and 700 ml ink tanks gives you the power to purchase ink based on the color frequency at which you print.

SUB-INK TANK SYSTEM

The Sub-Ink Tank System works to remove all the ink in the tank before having to replace it, helping to eliminate any wasted ink. The empty tanks can also be replaced on the fly, without stopping the printer. This is extremely useful during long print jobs.

PROFESSIONAL PRINT & LAYOUT

Canon's Professional Print & Layout (PPL) is a workflow software for the imagePROGRAF PRO Series. The software delivers enhanced layout settings, including soft proofing, nesting, and cropping images. Adobe Photoshop, Lightroom, and Canon Digital Professional are all compatible softwares.
