PRODUCTION REDEFINED.

Canon thought of every detail when it came to building the ultimate large-format production printer—intelligent media handling, a large 4.3" touch screen operational panel, torque control on the Take-up unit, a Sub-Ink Tank System, and a compact size reaching a whole new level of performance.

The new enhanced Canon imagePROGRAF 60" PRO-6100S and 44" PRO-4100S large-format printers have a new sleek design and are built for advanced printing solutions. With an 8-Color LUCIA PRO ink system, these printers are ideal for bringing production signage, commercial photography, and proofing businesses to the next level.

INTELLIGENT MEDIA LOADING

For the first time ever, an imagePROGRAF printer can load and recognize paper without the need for human intervention. Simply set the roll holder in the printer and the media will automatically feed into the printer. The built-in multi-sensor measures the surface reflection and the media thickness to determine the media type.

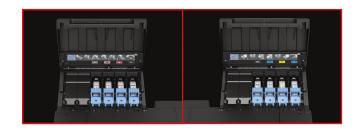

The PRO Series Mutilfunction Roll System is an option for the PRO-4100S and comes standard with the PRO-6100S.

REMAINING MEDIA ESTIMATION

Accurately manage the remaining media on a roll without the need to print a bar code—saving ink and media.

SUB-INK TANK SYSTEM

The Sub-Ink Tank System works to remove all the ink in the tank before having to replace it, helping to eliminate any wasted ink. The empty tanks can also be replaced on the fly, without stopping the printer. This is extremely useful during long print jobs.

ENHANCED SECURITY FEATURES

Newly enhanced security features ensure PRO Series users can feel confident that even the most sensitive data is protected.

• More secure printing through PIN code entry

• Disk Encryption on all print jobs

COLOR CALIBRATION

The built-in color multi-sensor offers precise calibration and color matching—using a three-color LED and a condenser lens, the sensor enables accurate recalibration of the device, allowing you to maintain a low average printer-to-printer color difference.

A single color calibration performed with one type of media can be applied to all Canon media in all printing modes.

The Device Management Console software, ideal for fleet management, lets you perform color calibrations remotely. This software lets you monitor the printer status of up to 50 units from almost any location in the world!

PRINT FROM USB THUMB DRIVE

PDF and JPEG files can be printed directly on the imagePROGRAF PRO-6100S/4100S from a USB thumb drive. Simply input the thumb drive into the USB port on the printer, preview the image on the operation panel, and print!

NEW LCD OPERATION PANEL

The large 4.3" LCD operation panel utilizes smartphone touch screen technology for easy operation. The top three most-used commands: Load, Feed and Cut, now have their own buttons below the operation panel for ease of use.

Wi-Fi™ CONNECTION

The PRO Series printers are Wi-Fi™ compatible. Stay connected!

HIGH-CAPACITY INK TANKS

The PRO Series gives you the capability to mix and match ink tanks based on your printing needs. Having available 160 ml, 330 ml, and 700 ml ink tanks gives you the power to purchase ink based on the color frequency at which you print.

PROFESSIONAL PRINT & LAYOUT

Canon's Professional Print & Layout (PPL) is a workflow software for the imagePROGRAF PRO Series. The software delivers enhanced layout settings, including soft proofing, nesting, and cropping images.

Canon's Professional Print & Layout (PPL) software for imagePROGRAF PRO Series printers offers features that help streamline your printing workflow.

• Can be used as stand-alone RIP or as export module in Adobe® Photoshop®, Adobe Lightroom, or Canon Digital Photo Professional

• Create and save custom layouts

• Preview of multiple images at the bottom of the software

• 16-bit printing workflow

POSTERARTIST LITE

Take your business to the next level by creating custom-made posters in-house with PosterArtist Lite. Select from a full suite of images, backgrounds, fonts, and colors to create professional posters.
